SUMMARY

Full-stack developer and recent Computer Programming graduate (Seneca Polytechnic, 2026) who builds end-to-end web applications: React/Next.js frontends, Python and Node.js backends, and SQL and NoSQL databases. Hands-on experience integrating LLM and speech models into working applications, implementing authentication and access control, and deploying to Vercel, Render, and Firebase. Seeking a full-stack role on a SaaS product team. Open to remote and hybrid.

TECHNICAL SKILLS

Frontend: React, Next.js 14, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion, Progressive Web Apps
Backend: Python (FastAPI), Node.js, Express.js, REST API design, JWT authentication, MVC architecture
Databases: MongoDB, MySQL, SQLite, Firebase Realtime Database, SQL
AI / ML: LLM integration (Anthropic API), speech-to-text (faster-whisper), text-to-speech (Piper), voice-assistant pipelines
Cloud & Tools: Vercel, Render, Firebase, Cloudflare (DNS), Git, GitHub, Linux CLI, VS Code
Security: bcrypt, refresh-token rotation, role-based access control, input validation, OWASP basics

PROJECTS

HPYS Events | Full-stack web app · FastAPI, SQLite, React, Vite, Tailwind CSS 2026

- Built a full-stack web app for Hariprabodham Youths Sabha Scarborough to manage and archive its bi-weekly gatherings.
- Automated event creation: pasting a YouTube URL auto-extracts the thumbnail, topic, and date using yt-dlp, with post-event audio download.
- Built a speaker directory with profiles and event history, a topics browser, and upcoming/past event views with search, backed by a FastAPI REST API and SQLite.

Sabha Rides | Progressive Web App · React, Firebase Realtime Database 2026

- Built a PWA for a community organization and evolved it through five versions.
- Implemented role-based access control, attendance tracking, and WhatsApp export on Firebase Realtime Database.
- Added an in-app voice assistant (Jarvis) to the product.

SecureAuth | Authentication system · Node.js, Express, MongoDB, JWT 2024–2025

- Built an authentication platform from scratch with JWT access tokens, refresh-token rotation, bcrypt password hashing, and HTTP-only cookie handling.
- Designed an MVC architecture with middleware-based route protection and server-side validation, with the demo deployed on Render.

EXPERIENCE

Produce Team Lead | Walmart Canada · Mississauga, ON Oct 2026 – Present

- Lead the produce department team, directing daily work and coordinating with store management.
- Maintain product quality, stock levels, and department standards in a fast-paced retail environment.

Freelance Web Developer | Self-employed · Toronto, ON 2025–Present

- Launched a freelance web development practice for local Toronto-area small businesses, building sites with Framer, Webflow, and JavaScript.
- Designed tiered service packages (starter, standard, premium) with a structured onboarding and delivery workflow.

Overnight Associate | Walmart Canada · Scarborough, ON 2024 – Oct 2026

- Execute high-volume nightly operations under time-sensitive conditions to meet departmental targets.
- Resolve inventory discrepancies and process issues, and coordinate with the overnight team with reduced supervision.

EDUCATION

Diploma in Computer Programming | Seneca Polytechnic · North York, ON May 2024 – Aug 2026

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Web Development, Databases, Operating Systems, Networking Fundamentals.
